

Cornell Reddick

(312) 833-5262 | |

Full Stack Software Engineer | Military Veteran | Team Lead

Full Stack Software Engineer with 5+ years of experience in enterprise web application development using Angular, Java, and Spring Boot in Agile/Scrum environments. Proven track record in cloud application migration, REST API development, and CI/CD pipeline deployment. 15+ years of leadership experience as a U.S. Army Veteran with a focus on technical project management, cross-functional collaboration, and delivery excellence.

EDUCATION

Masters in computer science Expected Graduation June 2026

Stevens Institute of Technology

Bachelor of Science in Information Technology Graduated in May 2021

Strayer University

Associate degree in general studies, Graduated in May 2012

Central Texas Community College

TECHNICAL SKILLS

Software Development Methodologies: Agile, Scrum, Kanban

Testing Frameworks: Selenium WebDriver (for web applications), JUnit, TestNG, NUnit, Jasmine, Cucumber, Postman

EXPERIENCE

CGI Federal

Software Engineer October 2023 – Present

Delivered multiple end-to-end Angular and Java components, including business-accepted modules for major federal projects applications.

Migrated multiples legacy applications from Knockout.js applications to modern Angular (v16+), significantly enhancing performance, maintainability, and user experience.

Demonstrated Java development experience, employing best coding practices.

Developed RESTful service in Java with Spring Boot to support dynamic UI components built in Angular.

Proven ability to work independently and collaboratively within a dynamic team environment, consistently delivering quality code for review and product owner demonstration.

Hands-on experience with modern Java development tools like Maven, Github Enterprise, Github Actions, Tomcat, Eclipse, and IntelliJ.

Extensive background in web application development, leveraging Angular, Spring framework, and following Agile methodologies.

Skilled in SQL and adept at using database tools for back-end support.

Responsibilities encompass authoring and reviewing code, participating in daily team discussions, collaborating on technical design sessions, and engaging with clients and end-users to provide technical insights.

Continuous commitment to improving development tools, technologies, and system architecture.

Proven ability to create and enhance automated testing scripts for applications.

Wells Fargo.

Junior Software Engineer January 2023 – October 2023

Contributed to an Agile Scrum team responsible for maintaining six applications (6 cloud-based) during a two-year tenure.

Collaborated with cross-functional teams to identify and resolve critical production issues promptly, minimizing downtime and ensuring a seamless user experience.

Developed new features and functionalities using Angular and integrated them with the backend services, contributing to a 20% increase in user engagement.

Managed over 33 successful product deployments, delivering robust solutions that exceeded client expectations.

Focused on addressing security vulnerabilities while addressing business requests, fixing production defects, and building new features and components using Angular and Java.

Utilized CI/CD tools (Jenkins, Artifactory, uDeploy, GitHub) for efficient and reliable deployment.

Performed unit tests using JUnit to validate code functionality and reliability.

Addressed hundreds of security vulnerabilities in Java and TypeScript for six cloud applications, using tools like Checkmarx, ThreadFix, and Black Duck.

Wells Fargo.

Junior Software Engineer April 2021 – January 2023

Collaborated on a Kanban team to migrate a legacy JavaScript/Java application to the cloud using Angular and Java technologies.

Developed test automation scripts to ensure efficient and reliable testing of cloud-based applications.

Utilized CI/CD tools (Jenkins, Artifactory, uDeploy, GitHub) for streamlined deployment and release workflows.

Managed multiple branches for smooth code deployment and production releases.

Managed 17 successful product deployments, delivering robust solutions that exceeded client expectations.

Demonstrated expertise in implementing comprehensive unit tests using JUnit, achieving an exceptional 95 percent code coverage.

Created and optimized SQL scripts to enhance automation tests and resolve issues.

Analyzed and resolved various production defects within the cloud application.

Softdocs, Inc.

Technical Support Specialist October 2018 – April 2021

Provided On-site technical assistants, debug code (JavaScript), and repaired over 400 electronic forms.

Designed and replicated over 100 (JavaScript) base electronic forms.

Contributed to the technical support page by creating FAQs and writing community articles to help customers troubleshoot product issues.

Analyzed forms and workflows, providing guidance to customers on improving efficiency.

Managed Zendesk ticketing system support queue, resolving over 1300 tickets with a 99 percent success rate. Collaborated with Development and Quality Assurance teams to resolve product and document issues. Interacted daily with different customers' servers, hardware, and operating system software to troubleshoot product issues.

Successfully resolved performance issues daily within multiple customers' databases using SQL queries.

Microsoft Software and Systems Academy (MSSA) February 2018 – June 2018 Cloud Application Development

Obtained the Microsoft Technology Associate (MTA 98-361) certification for Software Development Fundamentals as pre-requisite for the Microsoft Software and Systems Academy. MSSA is an 18-week, full time, hands-on IT training program developed by Microsoft. The program leverages college accredited courses and the goal of preparing transitioning service members for careers in technology.

Designed, composed, and built applications using the ASP.NET framework

Experience with Azure cloud platform

Experience designing with HTML5

Performed unit and integration testing to validate solutions with ASP.NET projects

Understanding of C#, T-SQL, and ASP.NET MVC

Experience designing web page with JavaScript

CERTIFICATIONS

Microsoft Technology Associate MTA 98-361 Software Development Fundamentals certification

CORE COMPETENCIES

Agile Software Development | Cloud Application Migration | REST API Development | Angular Development | Java Spring Boot | Test Automation | DevOps CI/CD | SQL Optimization | Security Remediation

Languages: Java, JavaScript, TypeScript, C#, SQL

Frameworks: Angular, React, Node.js, Spring Boot, Hibernate

Tools: Jenkins, Git, uDeploy, SonarQube, Checkmarx

Databases: MySQL, SQL Server, Oracle, PostgreSQL

CI/CD & DevOps: Jenkins, GitHub Actions, Artifactory

Testing: JUnit, TestNG, Selenium, Postman
